FINALIZING PROJECTS + POSTERS

DEBORAH TORRICO-PARDO AND DEV SRIVASTAVA

SYMPOSIUM...

GREAT OPPORTUNITY - take advantage of it!

TURN AND TALK

Being fully honest, how is your Summer Research project progressing? Have you started creating a poster, from the template in the Google Classroom?

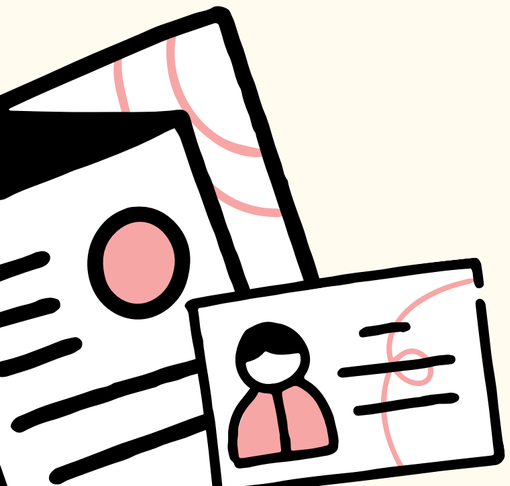

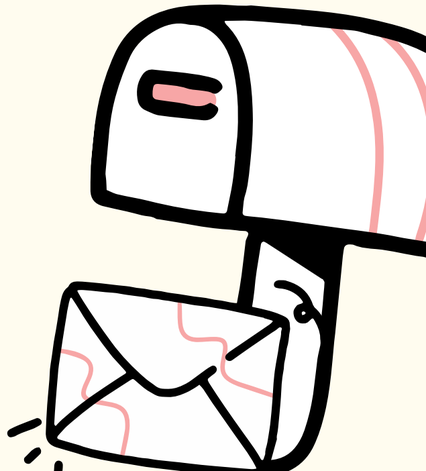

CONTINUITY

We hope that you all continue researching during the school year!

It's okay if you haven't finished your project. Research takes time (some taking up to years), and it's an iterative process.

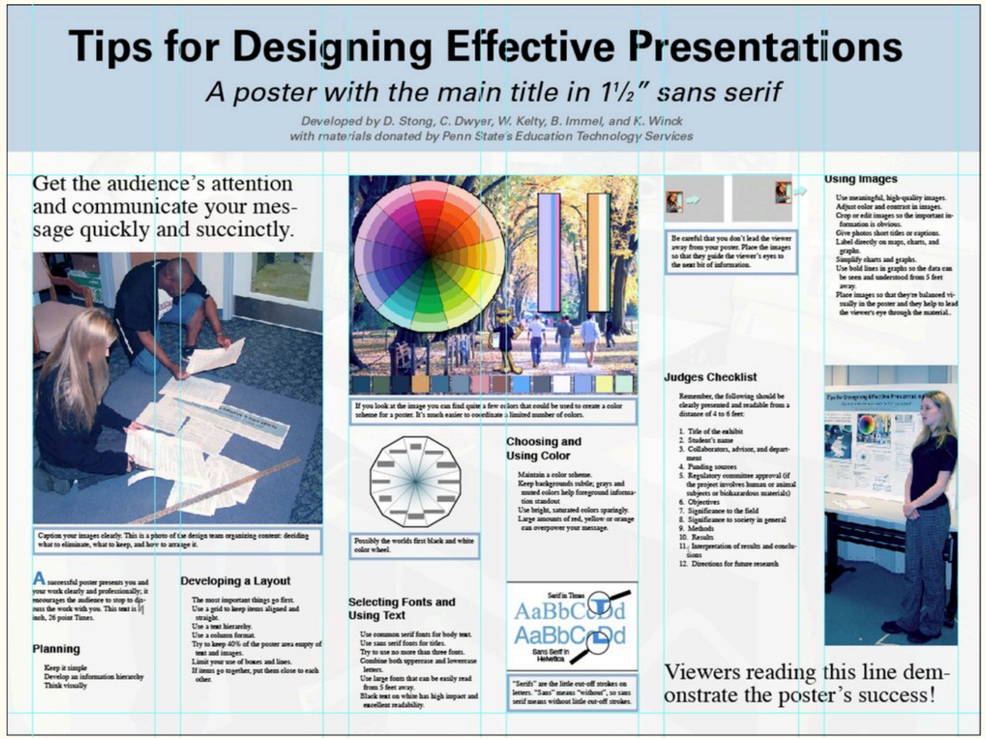

Q: What are some ways you can continue your research project after Summer Break?

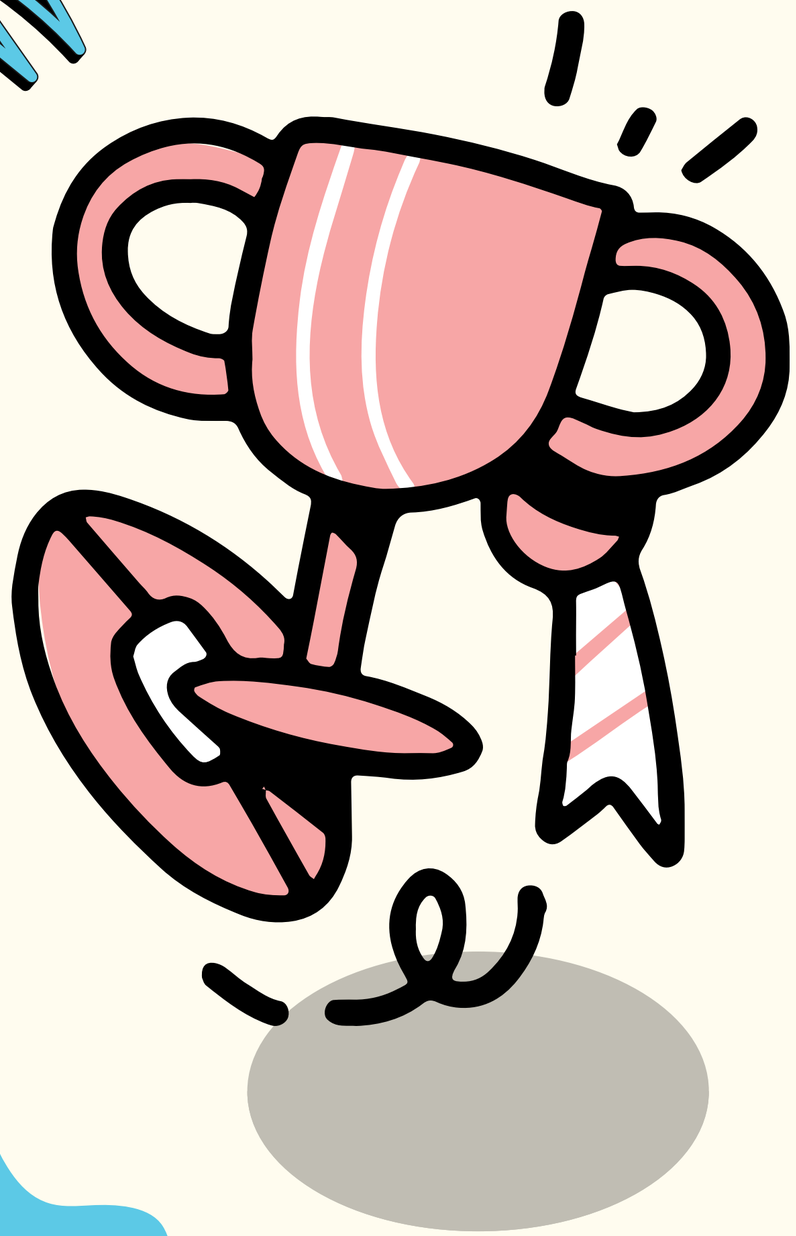

FINALIZE YOUR RESEARCH POSTERS

Our one REQUIREMENT for attending the symposium on August 22nd is a COMPLETED poster. DUE 08/12 (in 6 days!)

TURN AND TALK

What makes a good research poster? What is essential vs. unneccesary to add?

TURN AND TALK

How do you find opportunities, projects, and interests in your community? How has talking to people given you ideas to pursue something previously unknown to you?

EMAIL BASIC EXAMPLE:

Ms. Colley, your English teacher, has a daughter (Kathy) who graduated UVA majoring in pre-med.

You want to study medicine, so you ask her to connect you with Kathy.

You learn about all the clubs Kathy did in high school to prepare for premed, as well as advice she wish she knew earlier.

RESEARCH EMAIL:

You want to take your 3D-printed bionic arm project to the next level and get published in a journal

You cold email 15-20 professors at local universities

One responds, and you get an internship in that professor's lab!

GEORGE MASON UNIVERSITY

MENTOR EMAIL:

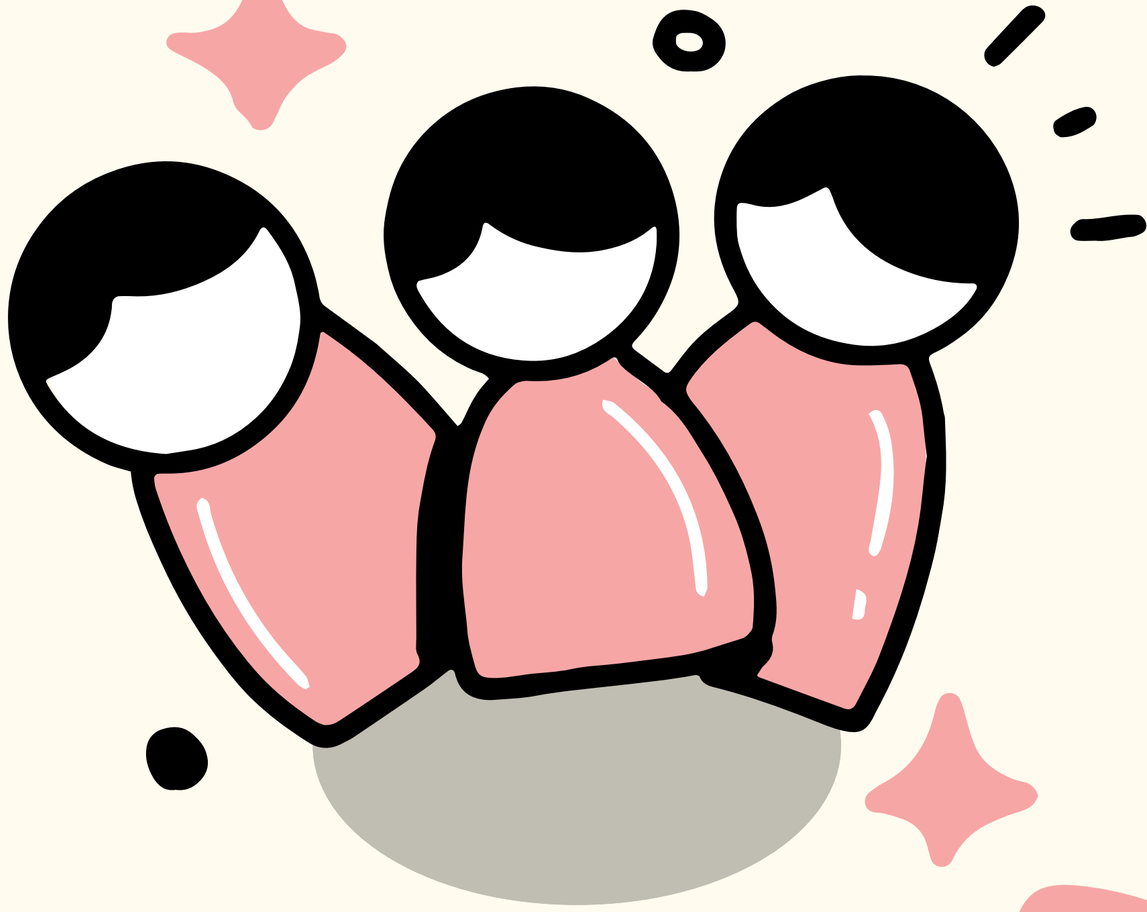

You applied for a networking event in San Francisco

You cold-emailed the person running the event showing your interest...

TURN AND TALK

Why is it important to have experience? How can you convey your thoughts and work clearly?

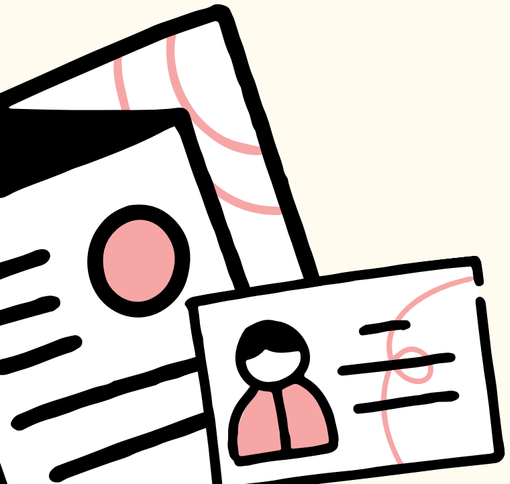

PUBLICATION/RESUME

Having your research published adds a whole layer of credibility to your work!

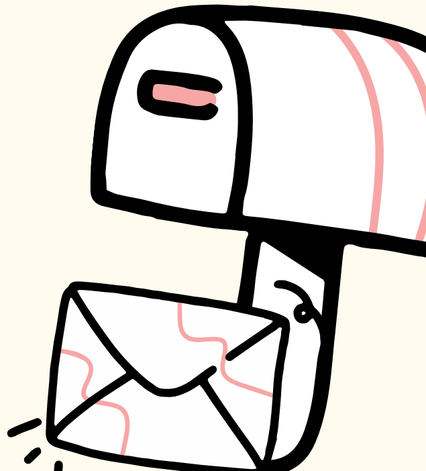

- You took the time to apply to a journal
- Most journals are peer-reviewed: If accepted, it shows strength in research

Even presenting at a symposium is a form of publication!

Differnet levels of journals:

- Middle School/High School (VJAS)
- Collegiate (IEEE, Nature, NeurIPS)

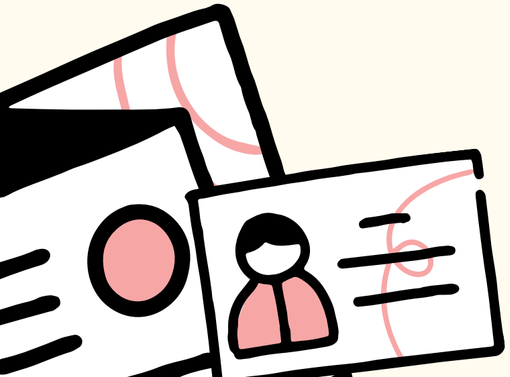

PUBLICATION/RESUME

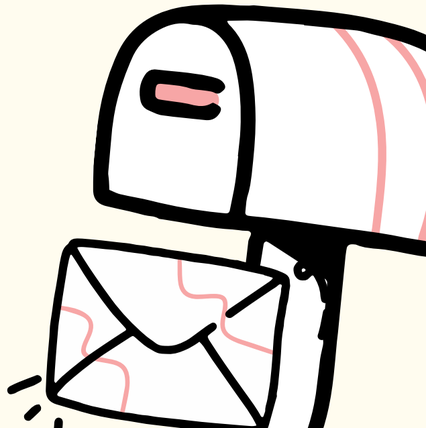

Having a well-rounded list of activities to list on your resume helps show employers/professors that you are capable of handling a large workload!

If applying to a targeted program, you can have a directed resume.

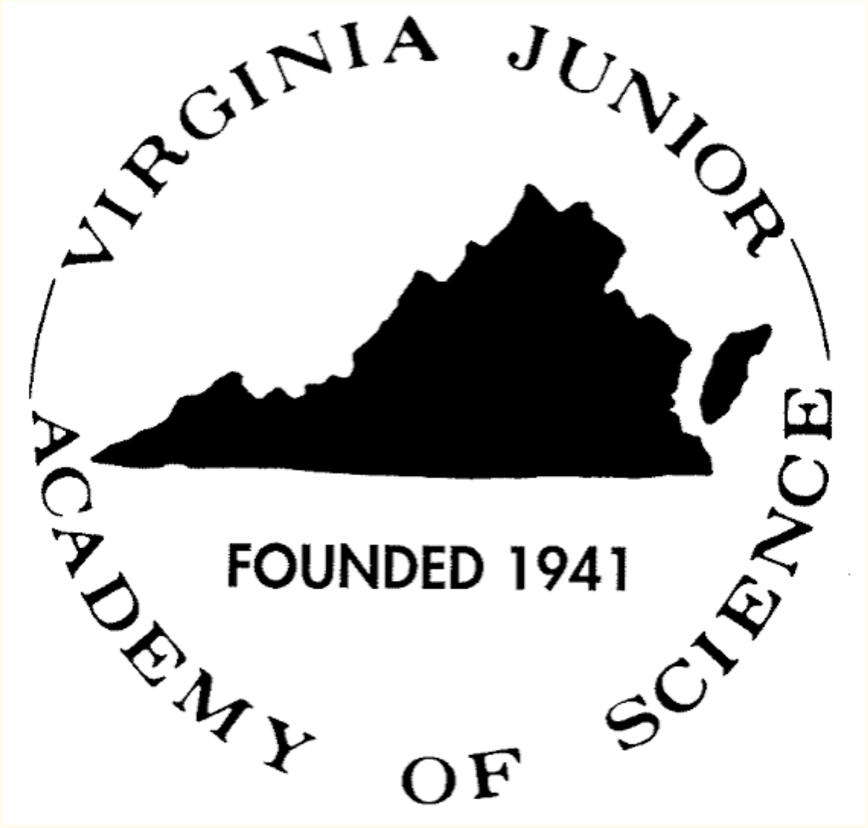

Include:

- Work experience
- Volunteer hours
- Courses taken
- Awards received

PUBLICATION/RESUME

Open to middle and high school students interested in STEM.

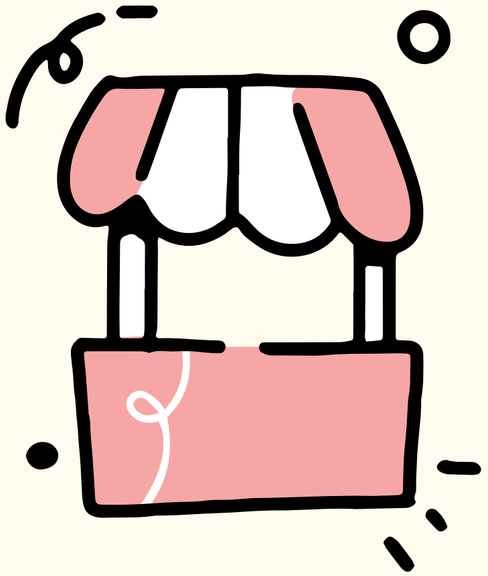

Students can conduct and present original research at the annual symposium. Monthly STEMinars feature scientists, researchers, and STEM professionals.

Members can build leadership skills by serving as Student Communication Liaisons (SCLs) or taking on other leadership roles.

It's a great opportunity for college applications, scholarships, and networking.

Students meet and collaborate with peers from across Virginia who share similar interests.

TURN AND TALK

When presenting your research in two weeks, how will you take advantage of the opportunities given at the symposium?
